

ATTN: Call for Innovation [CFI] – March 29, 2018 Addendum

Surrey and Vancouver appreciate all the submissions we have received to date, as we move through the Smart Cities Challenge process. At this time, we would like to share our Focus Area and a list of Desired Outcomes that will form the basis of our April 24, 2018 Initial Application.

FOCUS AREA:

- MOBILITY

DESIRED OUTCOMES:

- Mitigate congestion issues
- Reductions in emissions, and travel times
- Increased use of sustainable transit modes
- Increased health and community outcomes
- Unlocking the potential of mobility for everyone
- Increasing access to mobility services
- Apply new technologies
- Increased safety
- Better data management
- Increased people moving capacity
- Absorb regional growth and enhance live-ability

NEXT STEPS:

- If you have already submitted a proposal, in the direction of mobility, we will be in touch to further understand how your submission might align with our Initial Application.
- If you have submitted, but toward a different focus area, we implore you to re-submit a proposal that aligns with both the Mobility Focus Area and list of Desired Outcomes.
- If you have not submitted, please do so in line with the stated Focus Area and Desired Outcomes
